

COMPREHENSIVE BLOOD SCREENING

Give us 3 minutes of your time...
we will give you a good picture of your health!

Early detection saves lives and leads to lower health care costs!

Comprehensive Blood Wellness

This program helps with early disease detection for kidney, liver and metabolic disorders such as Diabetes, Anemia, Leukemia, and High Cholesterol, that leads to heart disease, among others.*

A/G Ratio	Globulin	WBC
Albumin	Glucose	RBC
Alk Phos	HDL	Hemoglobin
ALT	LDH	Hematocrit
AST	LDL	MCV
B/C Ratio	Phosphorous	MCH
CO2	Sodium	MCHC
Chloride	T. Bilirubin	5 Cell Diff.
Cholesterol	T. Protein	% granulocytic
CPK	Triglycerides	% lymphocytic
Creatinine	Urea Nitrogen	% basophilic
GGTP	Uric Acid	% monocytic
		% eosinophilic
		Platelet Count

Prostatic Specific Antigen Test (PSA)

Detects a protein in blood of individuals that could have prostate cancer.

TSH (Thyroid Screening)

Indicates how the Thyroid is functioning.

C Reactive Protein

Elevated levels detect damage or change to the walls of arteries in the heart or brain. Can detect the risk of heart attack or stroke.

A1C Hemoglobin

Estimated Glucose level for the 3 past months

Vitamin D

Used to detect deficiency in the blood that has a direct impact on osteoporosis, heart disease, cancer, and chronic pain

Preparation for Testing

Fast 12 hours prior to your scheduled test time. Water or Black Coffee can be consumed

Confidential and Credible

Results will be sent directly to employees home for complete confidentiality. All results are reviewed by Dr. Charles H. Zeigler D.O., MPH
